Name of Activity Organized	One day Seminar	
Title Of activity	Intellectual Property Rights	
Program Co- Ordinator	Prof. A.S. Sawarkar	
Date of Commencement	20/02/2024	
Date of Completion	20/02/2024	
Place of activity	FF-13	
Participated By	Second Year & Third Year Students	
No. Of Participants involved	130	
Expert	Dr. Deepa Choudhari, Associate Professor & Head, MBA Department, GWCET, Nagpur	
Summary Of Activity	She gave the brief introduction of Intellectual property rights (IPR). She said that IPR have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. The guest speaker gives the knowledge that IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. Each industry should evolve its own IPR policies, management style, strategies, and so on depending on its area of specialty. The main objective of this seminar was 1) To encourage the creation of a wide variety of intellectual goods for consumers. 2) Recognize the legal frameworks and international treaties 3) Understand international protections for IP rights.

REPORT OF SEMINAR ON "INTELLECTUAL PROPERTY RIGHT"

TITLE:	SEMINAR	
NAME OF ACTIVITY:	"INTELLECTUAL PROPERTY RIGHT"	
DATE:	14th August 2023	
TIME:	10:30 AM To 12:30 PM	
VENUE:	GWCET Auditorium, Nagpur	
ORGANISED BY:	MECHANICAL ENGINEERING DEPARTMENT IN ASSOCIATION WITH IQAC	
NAME OF EXPERT:	Mrs. Chhaya Satpute Ex- Senior Documentation officer, Nagpur	
PARTICIPATED BY:	B.E MECHANICAL ENGINEERING STUDENTS	
NO. OF PARTICIPANTS:	STUDENTS 31	
ACTIVITY INCHARGE:	PROF.M.D.KARAMBE	
COURSE CONTENT:	 The specific time period for innovations or creations. It protects inventions, designs, logos, artistic or literary or dramatic works and also confidential information of any business that enables it to succeed. IPRs are granted to encourage research and development in order to promote better innovation and foster growth in society. It levels the playing field for the start-ups against the incumbents, thereby preventing exploitation of innovations. Furthermore, competitive advantage increases the revenue of start-ups and enlarges its consumer base. It is pertinent to build a robust strategy that involved carrying out a due diligence procedure and is properly planned to ensure that the start-up seamlessly obtains IP protection. 	
OBJECTIVE	To provide participants with comprehensive overview, giving broad idea about Intellectual Property Rights and its importance.	
OUTCOME OF ACTIVITY:	Students learnt about the important factors to protect one's business or product from being copied. The seminar was a success and was much appreciated by the students as they significantly benefited from this seminar.

Report on Intellectual Property Rights

Govindrao Wanjari college of Engineering & Technology has organized a Workshop on "Intellectual Property Rights" on 20th February, 2023. The workshop was conducted under the guidance of Dr. Salim Chavan, Principal GWCET.

Department of Management Studies & Research has taken an initiative for awareness of Intellectual Property Rights for the students.

The speaker was Prof. Abhishek Shahu, Professor at Tirpude Institute of Management Education. He had Highlighted the importance of documenting ideas properly and patenting it, he said that in the coming years the country will known for its scientific creations in different fields. "Protection for the intellectual property will be an encouragement to budding students to come out with more innovations and inventions."

He pointed out that "We need to understand how to protect our publications and research work and at the same time bring it out for the benefit of the public. Awareness should be created about this and subsequently increase our research work." 41 Students have attended the guest lecture.

OBJECTIVES OF THE WORKSHOP

- To understand various components of IPR.
- > To know about use of IPR.

Benefits of the Workshop:

- > The Workshop helps to identify the components of IPR and the use of the same.
- > It helps to know about new ideas.
- > To understand the difference between copyright and design.

Outcomes:

- Students learnt how IPR provides total control over a new innovation and its creator.
- ➤ IPR had provided a platform to discuss how small innovations influence societies at large
- > Students learnt how to indulge in innovating and patenting ideas that will be useful for all the classes of individuals in the society

A Seminar Report on "Intellectual Property Rights"

The Computer Science and Engineering Department organized a one-day seminar on "Intellectual Property Rights" in the session 2022-23. The resource person for the seminar was Dr. Samrudhi Churad, Assistant Professor, MBA Department, GWCET, Nagpur.

The session held on Thursday, 23rd February 2023, with the active participation of approximately 96 students and 30 faculty members. The expert talked about the Intellectual Property. She said that Intellectual property rights (IPR) have been defined as ideas, inventions, and creative expressions based on which there is a public willingness to bestow the status of property. IPR provide certain exclusive rights to the inventors or creators of that property, in order to enable them to reap commercial benefits from their creative efforts or reputation. There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is a recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application. IPR is prerequisite for better identification, planning, commercialization, rendering, and thereby protection of invention or creativity. Each industry should evolve its own IPR policies, management style, strategies, and so on depending on its area of specialty.

The main objective of this seminar was

- 1) To encourage the creation of a wide variety of intellectual goods for consumers.
- 2) Recognize the legal frameworks and international treaties
- 3) Understand international protections for IP rights.

This program was organized under the guidance of Dr. Salim Chavan, Principal, GWCET. He appreciated the Head of department for the good conduction of such an intellectual program for the students and faculty in a disciplined manner.

----Notice----

Subject:- 108th Indian Science Congress registration.

As per the instruction of our Hon'ble Principal, Dr. Salim Chavan, I am pleased to inform all the stakeholders of GWCET i.e. Staff, Students, Faculty, 108th Indian Science Congress is schedule to be held at RTMNU during 03-07 January 2023. Our institute participation in ISC is must as we are part and parcel of RTMNU. Every department should also keep the best Project/Idea ready to be presented in 108th ISC.

The theme of the congress is "SCIENCE AND TECHNOLOGY FOR SUSTAINABLE DEVELOPMENT WITH WOMEN EMPOWERMENT"

In this regard our Hon'ble Vice- Chancellor of RTMNU appeals Teachers/ Students to register online for the event at website - www.isc2023.org.

The registration fees details are as under-

- 1. Registration fees for the student delegates Rs 1200 upto 30th November.
- 2. Registration fees for the student delegates Rs 1500 after 30th November.
- 3. Registration fees for the delegates Rs 2000 upto 30th November.
- 4. Registration fees for the delegates Rs 2500 after 30th November.
- 5. Registration fees for accompanying person Rs 1500.

This is for your kind information and necessary action.

Abstract (100 words): Most of the villages in India have not found out alternate livelihood for its rural poor, where farmers live in poverty due to frequent failure of monsoon, resulting in crop loss and financial loss. With the growth in urban population, strong belief in good and clean food habits, increased income and higher purchasing power, the chicken industry has been growing phenomenally, thereby making the lives of farmers happier and richer. This project will improve the satisfaction levels of farmers through services being provided by the Integrator and suggests measures to improve the living conditions of the farmers.

Outcome: This project is found to be very useful and effective for giving life to new born duck & kadaknath breed chics successfully within twenty one days. One can go for start-up with mass production. This project will reduce the efforts and found to be used on mass basis.

Abstract (100 words):

In this work, we used a smart irrigation system where the water was allowed to drip on the roots of plants. It uses a soil humidity sensor to collect field information and is also used to monitor groundwater levels through the Blynk IoT application. Irrigation automation with live monitoring has been proposed using Wi-Fi modules and Cloud Computing. When the field gets dry and the groundwater level falls down it will be notified through SMS. The System has high efficiency and accuracy in fetching the live data of fields such as soil moisture level including the groundwater level. It uses node MCU, relay, and water pump.

Outcome:

This system will also improve the normal agricultural irrigation process by using drip irrigation which is used in less water wastage and it is cost effective. No one will have any hassles. Everything will be automated, so there won't be any need to physically monitor anything. Instead, you may check your device to see how your field is doing right now.

Abstract (100 words): Nagpur have large population and this population make lots of waste. Nagpur municipal corporation (NMC) do the best waste management. Nagpur municipal corporation (NMC) gathers all waste from home and store all waste in various dumping ground. But those dumping ground ace very big problem to store that waste safely, It catches fire very quickly. After those toxic gases such as dioxins, furans, mercury and polychlorinated biphenyls might be released into the atmosphere, which pollutes air emanating foul smell.

Our proposed project is based on Fire Alarm and Fire Extinguisher For the Dumping Ground. Our project show warning when waste on dumping ground catches fire and also run fire extinguisher. We created Small Circuit which run on battery power smoke sensor and Temperature sensor and GSM800. Sim Module. Our Sensor finds the smoke and Temperature, If it finds temperature is high or find smoke then and signal from GSM800 Sim Module which is connected in dumping ground office show the Alarm.

Keywords: Arduino UNO micro-controller, GSM800 Sim module, LM35D Analog Temperature Sensor, MQ-6 GAS SENSOR, Buzzer, Fire Alarm, Fire Extinguisher, Dumping Ground.

Outcome: The Project Represents an Alert When Waste on Dumping Ground Catches Fire and also Runs Fire Extinguisher then Shows the Warning in Control Room.
