Objectives :

The foremost aim of Poster Making Competition and PPT Presentation is to spread the importance of NEP 2020 with the help of creativity. The main objective of this activities to understand students:

1. To enhance the quality of education and research in India.
2. To make India a global education hub.
3. To provide equitable quality education to all students irrespective of their social, cultural, and economic backgrounds.
4. To make the curriculum flexible and to the reach of children.
5. To foster critical thinking and ethical values among learners.
6. To prepare the children for the future.

GLIMPSES OF POSTER COMPETITION & PPT PRESENTATION

As a part of ETRONIX 2023 under the guidance of Prof S.B. Ashtekar HoD Of Electronics & Telecommunication Department, a Poster Making competition was held on 28th JULY 2023. The Topic of the Competition was 'NEP 2020' is a vast topic to discuss and here the participants had to show their imagination through posters and PPT Presentation. Many students enthusiastically participated in the competition. There were in all 30 student participants. The winners have been given exciting prizes. Various senior faculty members also visited the competition and encouraged the participants. Our principal Dr. S.A. Chavan and Dr. Vivek Nanoti, Director of Priyadarshani College visited the competition and encouraged the participants. The final judgment was made by Prof A.V. Wanjari Hod Of Electrical Dept and Prof .N. H. Chahande. Hod Of Mechanical Dept encouraged the students by the prize distribution and appreciated the effort exhibited by the students .

Outcome:

Students will aware NEP 2020 Education Policy by making Poster Competition & PPT Presentation through this programme.

Concepts and Applications in Engineering

Course Objectives:

1. Provide students with a fundamental understanding of key concepts and principles in engineering, including mechanics, thermodynamics, materials science, and electrical circuits.
2. Develop students' ability to analyze engineering problems, apply appropriate mathematical and scientific principles, and formulate solutions using critical thinking and creativity.
3. Foster an appreciation for the interdisciplinary nature of engineering by exploring how different branches of engineering (e.g., mechanical, electrical, civil) interact and contribute to solving complex real-world problems.
4. Introduce students to ethical issues in engineering practice and encourage them to consider the societal impacts of engineering solutions, including sustainability, environmental responsibility, and social justice.

Course Outcomes:

Students will be able to:

1. Upon completion of the course, students should demonstrate a solid understanding of fundamental engineering principles and their applications in various engineering disciplines.
2. Students should be able to effectively analyze engineering problems, apply appropriate mathematical and scientific techniques, and develop innovative solutions.
3. Students should be capable of applying the engineering design process to develop solutions to open-ended problems, considering factors such as functionality, safety, cost, and manufacturability.
4. Students should demonstrate proficiency in using engineering tools and software for analysis, modeling, simulation, and design tasks relevant to the course material.
5. Students should exhibit an understanding of ethical principles in engineering practice and be able to identify and address ethical dilemmas that may arise in engineering projects.
6. Students should demonstrate the ability to work effectively in teams, exhibiting professionalism, respect for diverse perspectives, and a commitment to collective success.

UNIT 1:

The Vedic Corpus:

1. Introduction to Vedas
2. A synopsis of the four Vedas
3. Sub-classification of Vedas
4. Messages in Vedas
5. Introduction to Vedāṅgas
6. Prologue on Śikṣā and Vyākaraṇa
7. Basics of Nirukta and Chandas
8. Introduction to Kalpa and Jyotiṣa
9. Vedic Life: A Distinctive Features

Number Systems and Units of Measurement:

1. Number systems in India - Historical evidence
2. Salient aspects of Indian Mathematics
3. Bhūta-Saṃkhyā system
4. Kaṭapayādi system
5. Measurements for time, distance, and weight
6. Piṅgala and the binary system

UNIT 2:

Mathematics:

1. Introduction to Indian Mathematics
2. Unique aspects of Indian Mathematics
3. Indian Mathematicians and their Contributions
4. Algebra
5. Geometry
6. Trigonometry
7. Binary mathematics and combinatorial problems in Chandala Śāstra
8. Magic squares in India

Astronomy:

1. Introduction to Indian astronomy
2. Indian contributions in astronomy
3. The celestial coordinate system
4. Elements of the Indian calendar
5. Notion of years and months
6. Pañcāṅga – The Indian calendar system
7. Astronomical Instruments (Yantras)
8. Jantar Mantar of Rājā Jai Singh Sawai

UNIT 3:

Engineering and Technology: Metals and Metalworking:

1. The rise and fall of a great Indian technology
2. Mining and ore extraction
3. Zinc extraction
4. Copper and its alloys
5. Iron and steel in ancient India
6. Lost wax casting of idols and artefacts
7. Apparatuses used for extraction of metallic components

Engineering and Technology: Other applications:

1. Science and technology heritage of India
2. Science and technology heritage: Literary Sources
3. Science and technology heritage: Physical structures
4. Science and technology heritage: Temples
5. Science and technology heritage: Watershed management
6. Dyes, arts and perfume production.
7. Surgical-techniques
8. Shipbuilding
9. Status of Indigenous S & T

UNIT 4:

Town Planning and Architecture:

1. Perspective of Arthaśāstra on town planning
2. Vāstu-śāstra – The science of architecture
3. Eight limbs of Vāstu
4. Town planning
5. Temples in India: Marvellous stone architecture for eternity
6. Temple architecture in India
7. Iconography

Knowledge Framework and classifications:

1. Indian scheme of knowledge
2. The knowledge triangle
3. Prameya – A vaiśeṣikan approach to physical reality
4. Dravyas – the constituents of the physical reality
5. Attributes – the properties of substances and Action – the driver of conjunction and disjunction
6. Sāmānya, viśeṣa, samavāya
7. Pramāṇa – the means of valid knowledge

8. Saṃśaya – ambiguities in existing knowledge
9. Framework for establishing valid knowledge
10. Deductive or inductive logic framework
11. Potential fallacies in the reasoning process
12. Siddhānta: established tenets in a field of study

UNIT 5:

Linguistics

1. Introduction to Linguistics
2. Aṣṭādhyāyī
3. Phonetics
4. Word generation
5. Computational aspects
6. Mnemonics
7. Recursive operations
8. Rule based operations
9. Sentence formation
10. Verbs and prefixes
11. Role of Sanskrit in natural language processing
